

# How to download videos to your **COMPUTER** from Youtube

*Of course, there are other ways to do this, but this is my favorite.*

Find your favorite Youtube video, Add **ss** after the **period** and before the **y** in the URL, don't add any spaces or anything else, then hit your return key.

**add ss after the period and before the y**

**then hit return and it will take you to where you can download in various sizes. mp4360 is usually the best!**

After hitting return, you will arrive at this page, choose MP4 360p for the size, it will download to your computer. Now you can play it without the internet, you have a copy forever!!

http://youtube.com/watch?v=vwOCY0nPDG0

**Choose MP4 360p for size. It will download to your computer, Now you have it forever and do not have to stream it!**

Download	MP4	360p	/ MP3
	WebM	360p	
	FLV	240p	
	3GP	240p	YouTube
	3GP	144p	
	Audio MP4	128
